

Electric vehicles (EVs) displaying a permit issued by the Ministry of Transportation and Infrastructure are exempt from meeting the occupancy requirements of high occupancy vehicle (HOV) lanes in British Columbia, unless a sign is posted indicating otherwise.

An eligible EV has an electric propulsion engine and a battery storage system which can be charged from an external source (i.e. plugged into an electric charging outlet). The vehicle make, model, year and fuel type described below and appearing on the vehicle registration will be checked against the eligible vehicle list maintained by British Columbia's Clean Energy Vehicle Program (www.cevforbc.ca/eligible-vehicles) to confirm eligibility.

Complete the information requested below and return the signed application and a copy of vehicle registration by facsimile, email or mail (shown below). Questions? Contact us by email or telephone:
